

# Care Under Pressure

## ReddyPort™ Elbow and Non-invasive ventilation products

ReddyPort™ is an innovation that enables oral access for better non-invasive ventilation care without interrupting patient therapy.

The ReddyPort system allows clinicians to perform a variety of therapies on NIV patients without disrupting therapeutic pressure.

- Patented self-sealing valve—seals with ventilator pressure and self-reverts (A).
- Mask connector—connects to standard Philips Respironics® AF531 and Performax NIV masks (B).
- Ventilation—ReddyPort Elbow includes an anti-asphyxia valve and connects to standard NIV tubing (C).

*"Being able to clean the mouth is such a blessing. She cannot be removed from the mask because of shortness of breath. We are very happy with the new mask and will take it home with us."*

Family of Patient at Huntsman Cancer Hospital. Adult female with respiratory failure from pneumonia/pulmonary edema, DNI status.

## ReddyPort NIV Maintenance Kit

- Patented components seal with ReddyPort Elbow
- NIV pressure is maintained while cleaning and moisturizing, reducing mask removal, re-fitting and leaks
- Protective guard allows for easy cleaning and moisturizing, enabling appliance insertion and removal without the squeegee effect
- Uses the same VAP/VAE bundle protocols for NIV therapy to help reduce risk
- Decreases dependency on clinicians for issues like dry mouth

The kit includes standard swabs, brushes, moisturizing gel, antiseptic rinse, covered yankauer, and suction catheters.

The kit includes a removable microphone compatible with the ReddyPort Elbow. The battery powered speaker uses digital processing to remove breathing noises.

## ReddyPort Microphone

- Speaker and microphone seal with ReddyPort Elbow
- Allows patient to communicate with caregivers, family and friends without mask removal
- Improves patient satisfaction and can help with compliance
- Improves clinician satisfaction to enhance care coordination
